

DEEKSHA GAUTAM

SOFTWARE ENGINEER - APPLIED AI & LLM INTEGRATIONS

Pune, India | (+91) 9971077462

gautamdeeksha7098@gmail.com

github.com/deekshagautam

Software engineer with 3+ years of enterprise experience, now focused on turning existing language models into reliable AI solutions. Experienced in LLM routing, evaluation, privacy controls, backend APIs, workflow automation, CI/CD, and production delivery.

01 EXPERIENCE

Technology Analyst II | Citi

2023 - Present

- Built and modernized investment-platform services used across North America, including a Kafka-powered direct-placement platform that increased client growth by 47% and activation by 30%.
- Automated a rules-driven three-level approval workflow using Salesforce data, reducing end-to-end processing time by 78% across the NAM region.
- Raised automated test coverage from 32% to 95%, above the 80% engineering standard, and helped modernize approximately 35 Spring Boot services.
- Migrated delivery workflows from Jenkins and Bitbucket to GitHub and Harness with Maven, SonarQube, and OpenShift; recognized with Citi's Platinum Award.

Technology Analyst | Citi

2022 - 2023

- Delivered the TradeLink reporting suite for 50+ users, reducing manual effort by 65% and earning a Silver Award.

02 APPLIED AI PROJECTS

Hybrid AI Gateway | Personal Project

2026

- Built a privacy-aware local/cloud LLM router using Gemma 3 through Ollama and GPT-OSS through GroqCloud, with structured routing, fallbacks, evaluation suites, Docker, and GitHub Actions.
- Validated 106 automated tests and 7/7 end-to-end evaluation cases, including privacy hard-gate behavior and live model execution.

Pet Thought Generator | Personal Project

2026

- Created a working Streamlit GenAI application using Python, structured user inputs, prompt construction, Gemini API integration, and environment-based secret handling.

03 EDUCATION

MS in Analytics | Georgia Institute of Technology

2025 - 2027 (expected)

Applied computing, analytics modeling, statistical learning, and business.

B.Tech in Computer Science | IGDTUW

2018 - 2022

04 TECHNICAL TOOLKIT

AI & LLM: OpenAI/GPT, Gemini API, Ollama, Llama, Gemma, Mistral, GroqCloud, prompt design, LLM evaluation

Engineering: Python, Java, SQL, Spring Boot, REST APIs, Kafka, PySpark, MongoDB, Salesforce

Delivery: GitHub, Git, Bitbucket, Jenkins, Harness, Maven, SonarQube, Docker, OpenShift, JUnit
